PROJECTS

Wonderlust – Full Stack Travel Planning Application

Technologies: Node.js, Express.js, MongoDB, EJS, Tailwind CSS - Developed a full-stack travel and accommodation platform inspired by Airbnb. - Implemented complete CRUD operations for property listings and user data. - Followed MVC architecture to improve code scalability and maintainability. - Designed responsive and user-friendly UI using Tailwind CSS. - Integrated backend APIs with MongoDB for data storage and retrieval.

File Arranger System – Automation Project

Technologies: Python, OS Module, Shutil - Built a Python-based automation tool to organize files based on type and extension. - Automated directory scanning and file classification to reduce manual effort. - Improved file system management and accessibility using scripting techniques.

Food Recipe Web Application

Technologies: JavaScript, API Integration, HTML, CSS - Developed a web application that displays food recipes using third-party APIs. - Implemented search functionality to fetch and display recipe data dynamically. - Focused on clean UI and responsive design for better user experience.

ACHIEVEMENTS

- Solved **200+ Data Structures & Algorithms problems** on GeeksforGeeks.
 - Solved **100+ problems** on LeetCode.
 - Regularly practice problem-solving on multiple competitive programming platforms.
